Adtron Achieves ISO 9001 Certification from DNV

PHOENIX, AZ. April 18, 2001 -- Adtron Corporation recently achieved ISO 9001 certification by Det Norske Veritas Certification, Inc.

Alan Fitzgerald, President of Adtron commented, "With the DNV certification, Adtron achieved recognition for its quality and management systems. Our customers demand excellence, and we have long recognized the importance of documentation and quality measurement systems to reach that level of performance. We are proud to add ISO 9001 to our list of quality achievements."

Bob Benkendorf, CEO of Adtron added, "Our company-wide commitment to quality performance is infused in each employee and in every product we ship. Our customers in the OEM industrial and embedded systems market expect optimum reliability and quality, and Adtron delivers. ISO 9001 certification acknowledges our commitment."

For additional information, contact Adtron Sales at (602) 735-0300 or via email at sales@adtron.com.

Adtron Corporation designs and manufactures fixed and removable electronic data storage systems and card drives for applications requiring extremely reliable data storage, including telecommunications systems, embedded industrial computers, factory automation, test and measurement devices, medical equipment, and vehicle and avionics systems. Adtron products are compatible with existing systems and provide low cost, high capacity, long life, and highly reliable alternatives to standard electromechanical disk or tape drives. More information about Adtron can be found on the company's web site at www.adtron.com.

DNV Certification is one of the leading providers of assessment and certification for quality and environmental systems in the US and Worldwide.

ISO is the International Organization for Standardization. It is made up of some 130 national standards institutes from countries large and small, industrialized and developing, in all regions of the world. ISO develops voluntary technical standards which contribute to making industrial production and supply more efficient, safer and cleaner, and to making trade between countries easier and fairer.
