FOR IMMEDIATE RELEASE

SMART Storage Systems to Showcase Server and Enterprise Solid-State Solutions Product Portfolio at SC11

*Live product demonstration of newly released XceedStor in the SMART Modular Technologies Booth
#5408.*

Newark, CA – November 14, 2011 – SMART Storage Systems, a leading independent designer and manufacturer of solid-state storage products and a member of the SMART Modular Technologies family of global companies, will showcase its comprehensive portfolio of solid-state storage solutions during the SC11 exhibition (Washington State Convention Center, Seattle, WA from November 14 through 17). The SMART Storage solid-state products are designed to satisfy the demanding needs of today's server and enterprise applications.

SMART Storage Systems will demonstrate its newly released XceedStor in the SMART Modular Technologies' booth (#5408). In addition, the SMART Storage System's XceedIOPS 2.5" SAS SSD will be on display and demonstrated in RAID Inc. booth #2543.

Esther Spanjer, SMART Storage's Director of Technical Marketing, is available for press and industry analyst briefings to provide more information on SMART Storage Systems' solid-state storage products. To schedule a briefing during or before the show, please contact Esther at esther.spanjer@smartm.com.

About SMART Storage Systems

SMART Storage Systems is a technology leader in the design, development, and deployment of current and next-generation enterprise solid-state storage products. Combining leading-edge, enterprise-class design, and proven world-class support, SMART Storage Systems leverages its deep expertise in flash and enterprise storage technology. SMART Storage Systems delivers high-quality, high-reliability solutions to a broad customer base, including tier one storage and server OEMs. In support of these designs, SMART Storage Systems provides award-winning innovations in solid-state storage technology, such as NAND high-endurance Guardian™ technology, to a variety of customers in the enterprise storage, enterprise server, data center, defense, and industrial markets. SMART Storage Systems is part of the SMART Modular Technologies family of global companies. See www.smartstoragesys.com for more information.

About SMART Modular Technologies

Collectively, the SMART companies are leading designers, manufacturers, and suppliers of electronic subsystems for the most demanding OEMs around the world. The SMART companies have led the way over the past 23 years providing standard and custom products to leading electronics manufacturers in a broad range of industries including enterprise computing, servers, PCs, networking, industrial, telecommunications, defense, aerospace, and embedded applications. Taking innovations from the design stage through manufacturing and delivery, SMART has developed a comprehensive memory product line that includes DRAM, SRAM, and Flash memory in various form factors. SMART Storage Systems offers high-performance, high-capacity SSDs for enterprise, defense, aerospace, industrial automation, medical, and transportation markets. SMART's presence in the U.S., Europe, Asia, and Latin America enables it to provide its customers with proven expertise in international logistics, asset
